

Smart and functional business phone Slican CTS-330

System phone for companies which require sophisticated phone system and effective call and contact managing. Several models to choose – classical model – CTS-330.CL, IP system phone – CTS-330.IP.

CTS-330

CTS-330 with CTS-338 console

Phone profile is created and stored in Slican PBX memory. Phone can be used immediately after switching it on, without complicated and time consuming configuration. Programmable BLF buttons allow you to create individual functions, services or create a list of handy contacts. For your comfort and to increase number of programmable keys, you may connect to each Slican CTS-330 system phone series up to 4 CTS-338 consoles. With consoles you may program up to 170 buttons.

COMFORT OF WORK

Phone is equipped in high quality color, touch screen which ensures perfect visibility in different lighting conditions. Due to perfect voice quality and simple maintenance make this phone smart tool for every day work. Programmable touch and standard buttons of CTS-330 enable to function creation, services or contact.

FUNCTIONALITY

System phones Slican CTS-330 are designed to work with Slican NCP system and IPL-256, IPM-032 and IPU-14 PBX-es. CTS-330 will tell you what is duration of your call and how much it costs. Handy information about incoming calls, dialed numbers and missed calls allows you organize your work much more efficient. Access to the two phone books (public and private) and internal numbers list allows fast communication with selected subscriber.

MORE POSSIBILITIES

Slican CTS-330.IP system phone can be installed and used wherever there is Internet connections. Additional advantage is PoE (Power over Ethernet) standard.
